

PRESS RELEASE

Klüh Multiservices again main sponsor of the Capital Congress of Medicine and Health

Service provider from Düsseldorf with innovative tool for cleaning and new product line for patients

Düsseldorf/Berlin, 22 May 2019 – This year, Klüh Multiservices is once again one of the main sponsors of the Capital Congress of Medicine and Health, which is to be held from 21 to 23 May in Berlin. At the congress, the Düsseldorf based family business, experienced provider of infrastructural services and leading caterer in the hospital sector (see gv praxis 05/19), will be presenting digital innovations in cleaning with the highest hygiene standard and showing a varied and balanced nutritional range which offers culinary finesse on a plant basis.

Frank Theobald, Management Board Chairman: "As a quality service provider in the care market, we are committed to innovation and highly oriented to the needs of our customers in all developments. Our "Center of Digital Excellence" (CoDE) has set itself the task of identifying innovative topics early, transferring them to our services and thus creating added value for our customers.

Klüh's core competences in the health sector include hygienic cleaning in hospitals, where trained specialists and artificial intelligence work together. In Berlin, the Düsseldorf-based service provider will therefore be presenting the trend-setting tool "DigiClean®", which is used in the cleaning of university clinics, hospitals, rehabilitation clinics, facilities for senior citizens and nursing homes. The sophisticated digital system developed by Klüh displays the entire cleaning process, guarantees quality assurance and also ensures maximum transparency for the customer.

The new Klüh-Catering product line "Plant Power", which was developed for patients and senior citizens, is based on findings from long-term studies, which show that a plant-based diet has an extremely beneficial effect on health compared to a diet with a high share of animal products: it lowers cholesterol and blood pressure and also has a high influence on the Body Mass Index (BMI). The result is a selection of recipes which not only meet the challenges of supplying food for public institutions, but also reflect the transition to a more conscious, plant-based diet in line with the times.

About Klüh:

Klüh Service Management GmbH is a global multi-service provider. Founded in 1911, the company has decades of experience in the area of infrastructural services. The departments Cleaning, Catering, Clinic Service, Security, Personnel Service, Airport and Facility Service offer both individual services as well as integrated service concepts.

With nearly 50,000 employees in eight nations, the company achieves sales of around 806 million Euros (2018).

Klüh has already been a reliable partner of the healthcare industry for over 40 years. Its fields of activity include patient catering, service support, logistics, the processing of medical devices and cleaning at the highest hygiene standards – in so doing, both individual and integrated services are provided.
